SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Ramapuram Campus, BharathiSalai, Ramapuram, Chennai - 600089

FACULTY OF ENGINEERING AND TECHNOLOGY

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

QUESTION BANK

DEGREE / BRANCH: <u>B.Tech/CSE</u> with Specializations AIML, <u>BDA,CS</u> and <u>IOT</u>

IV SEMESTER

SUB CODE – SUBJECT NAME: 18CSC207J/ADVANCED PROGRAMMING PRACTICE

Regulation - 2018

AcademicYear: 2022-23

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY

Ramapuram Campus, BharathiSalai, Ramapuram, Chennai-600089

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

QUESTION BANK

SUBJECT : 18CSC207J -ADVANCED PROGRAMMING PRACTICE

SEM/YEAR:IV/II

Course Outcomes

CO1:Create Programs using structured, procedural and object oriented programming paradigms

CO2: Create Programs using event driven, declarative and imperative programming paradigms

CO3:Create Programs using parallel, concurrent and functional programming paradigms

CO4:Create Programs using logic, dependent type and network programming paradigms

CO5: Create Programs using symbolic, automata based and graphical user interface programming paradigms

CO6: Create Programs using different programming paradigms using python language

UNIT I

Structured Programming Paradigm- Programming Language Theory- Bohm-Jacopini structured program theorem- Sequence, selection, decision, iteration, recursion- Other languages: C, C++, Java, C#, Ruby - Demo: Structured Programing in Python- Procedural Programming Paradigm- Routines, Subroutines, functions- Using Functions in Python- logical view, control flow of procedural programming in various aspects- Other languages: Bliss, ChucK, Matlab- Demo: creating routines and subroutines using functions in Python- Object Oriented Programming Paradigm- Class, Objects, Instances, Methods- Encapsulation, Data Abstraction- Polymorphism, Inheritance- Constructor, Destructor- Example Languages: BETA, Cecil, Lava Demo: OOP in Python

| | PART-A (Multiple Choice Questions) | | | |
|----|---|---------|------------|--|
| Q. | Questions | Course | Competence | |
| No | | Outcome | BT Level | |
| 1 | In Python which parameter passing mechanism is used with function call. | | | |
| | a) Pass by value | | | |
| | b) Pass by Reference | CO1 | L1 | |
| | c) Both Pass by value and Pass by reference | | | |
| | d) None | | | |
| 2 | Which one is correct about variable names in Python. | | | |
| | a) All variable names must begin with an underscore. | | | |
| | b) Unlimited length | CO1 | L1 | |
| | c) The variable name length is a maximum of 2. | | | |
| | d) All of the above | | | |
| 3 | Which of the following is not the type of function argument? | | | |
| | a) Positional argument | | | |
| | b) Keyword argument | CO1 | L1 | |
| | c) Initial argument | | | |
| | d) Default argument | | | |
| 4 | What will be the output of the following Python code? | CO1 | L2 | |
| | x = 50 | | | |

| | def func(x): print('x is', x) x = 2 | | |
|---|--|-----|-----|
| | x = 2 print('Changed local x to', x) | | |
| | func(x) | | |
| | print('x is now', x) | | |
| | a) x is 50 | | |
| | Changed local x to 2 | | |
| | x is now 50 | | |
| | b) x is 50 | | |
| | Changed local x to 2 | | |
| | x is now 2 | | |
| | c) x is 50 | | |
| | Changed local x to 2 | | |
| | x is now 100 | | |
| | a) None | | |
| 5 | What will be the output of the following Python code? | | |
| | values = [[3, 4, 5, 1], [33, 6, 1, 2]] | | |
| | v = values[0][0] for row in range(0, len(values)): | | |
| | for column in range(0, len(values[row])): | | |
| | if v < values[row][column]: | 601 | T 2 |
| | v = values[row][column] | CO1 | L3 |
| | print(v) | | |
| | a) 3 | | |
| | b) 5 | | |
| | c) 6 | | |
| (| d) 33 | | |
| 6 | What will be the output of the following piece of code. [CLO-1,L3] | | |
| | def greet(name,msg='Good Day'): print("Hello",name + ', ' + msg) | | |
| | greet("AAA") | | |
| | greet("BBB","Good Morning") | CO1 | L2 |
| | a) Hello AAA Good Morning, Hello BBB Good Morning | | |
| | b) Hello AAA Good Morning, Hello BBB Good Day | | |
| | c) Hello AAA Good Day, Hello BBB Good Day | | |
| | d) Hello AAA Good Day, Hello BBB Good Morning | | |
| 7 | What is the correct syntax to create a class named Student that will | | |
| | inherit properties and methods from a class named Person in Python? | | |
| | a) class Student from Person: | 961 | |
| | b) class Student(Person): | CO1 | L1 |
| | c) Student(Person): | | |
| | d) class Student: Person | | |
| 8 | What value will be printed by the print statement given in the following code? | | |
| ~ | odd=lambda x: bool(x%2) | | |
| | numbers=[n for n in range(10)] | | |
| | print(numbers) | | |
| | n=list() | | |
| | for i in numbers: if odd(i): | CO1 | L3 |
| | continue | COI | L3 |
| | else: | | |
| | break | | |
| | a) [0, 2, 4, 6, 8, 10] | | |
| | b) [0, 1, 2, 3, 4, 5, 6, 7, 8, 9] | | |
| | c) [1, 3, 5, 7, 9] | | |

| | d) Error | | |
|----|--|-----|-----|
| 9 | The number of arguments taken by lambda function | | |
| | a) 1 | | |
| | b) 2 | CO1 | L1 |
| | c) Any number | | |
| | d) None | | |
| 10 | Which of the following is true regarding Generic/meta programming? | | |
| | a) generates semantic associations | | |
| | b) Programs about programs | CO1 | L1 |
| | c) generates higher-order programs | | |
| | d) is used for assembly level manipulations | | |
| 11 | If a is a dictionary with some key-value pairs, what does a.pop('key') | | |
| | do? | | |
| | a) Removes an arbitrary element | G01 | * 0 |
| | b) Removes all the key-value pairs | CO1 | L2 |
| | c) Removes the key-value pair for the key given as an argument | | |
| | d) Invalid method for dictionary | | |
| 12 | According to Bohm-Jacopini, a function is possible by combining | | |
| | subprograms in which three manners? | | |
| | a) Jump, Sequence and Loop | GO1 | T 1 |
| | b) Sequence, Function Calls and Subroutines | CO1 | L1 |
| | c) Sequence, Iteration and Selection | | |
| | d) Iteration, Macros and Branching | | |
| 13 | What are the values printed by the two print statements given below? | | |
| | a=10 | | |
| | b=20 | | |
| | def change(): | | |
| | global b | | |
| | a=45 | | |
| | b=56 | CO1 | L3 |
| | change() | 201 | 1.3 |
| | print(a) | | |
| | print(b) | | |
| | a) 10 56 | | |
| | b) 45 56 | | |
| | c) 10 20 | | |
| | d) Syntax Error | | |
| 14 | Which of the following is the use of id() function in Python? | | |
| | a) Every object doesn't have a unique id | | |
| | b) id returns the identity of the object | CO1 | L1 |
| | c) All of the mentioned | | |
| | d) None of the mentioned | | |
| 15 | What will be the value printed by the last print statement in the following Python | | |
| | code? | | |
| | d={"id":101, "name":"AAA", "dept":"QA"} print(d) | | |
| | print(d) print("Emp ID=",d['id']) | CO1 | L3 |
| | print("Emp Name=",d['name']) | | |
| | print("EmpDept=",d['dept']) | | |
| | d['dept']="RA" | | |

| | print(d) | | |
|----|--|-----|----|
| | d.pop('dept') print(d['dept']) | | |
| | a) QA | | |
| | b) RA | | |
| | c) KeyError: 'dept' | | |
| | d) None | | |
| 16 | Which of the following is correct way to add all classes, methods or | | |
| | other datatypes(list, tuple, dictionary) etc of a module in Python? | | |
| | a) import * from module_name | | |
| | b) from module name import * | CO1 | L2 |
| | c) from module name import all | | |
| | | | |
| | d) import module_name as m | | |
| 17 | refers to the spaces at the beginning of a code line which | | |
| | is considered as the special important feature of Python. | | |
| | a) Indentation | CO1 | L1 |
| | b) Input | 001 | |
| | c) Inherit | | |
| | d) Identification | | |
| 18 | is a graphical representation of structured programming | | |
| | using Top down analysis. | | |
| | a) Programming Paradigm | CO1 | L1 |
| | b) Structogram | COI | |
| | c) Flowchart | | |
| | d) Proess block | | |
| 19 | Which of the following statements is incorrect about the following | | |
| | code? | | |
| | class People(): | | |
| | definit(self, name): | | |
| | self.name = name | | |
| | def namePrint(self): | | |
| | print(self.name) | | |
| | person1 = People("John") | CO1 | L3 |
| | person2 = People("Sai") | | |
| | person1.namePrint() | | |
| | a) person1 and person2 are two different instances of the People | | |
| | class | | |
| | b) The init method is used to set initial values for attributes | | |
| | c) 'self' is not needed in def namePrint(self): | | |
| | d) person2 has a different value for 'name' than person1 | | |
| 20 | is not a keyword, but by convention it is used to refer to | | |
| | the current instance (object) of a class. | | |
| | a) class | CO1 | |
| | b) def | CO1 | L2 |
| | c) self | | |
| | d) init | | |
| 21 | Which of the following is the correct way to define an initializer | | |
| | method? | | |
| | a) def init (title, author): | CO1 | L2 |
| | b) def init (self, title, author): | | |
| | c) def init (): | | |
| |) deliiit(). | | |

| | d) init (self, title, author): | | |
|----|---|-----|----|
| 22 | How the constructors and destructors can be differentiated? | | |
| | a) Destructor have a return type but constructor doesn't | | |
| | b) Destructors can't be defined by the programmer, but | | |
| | constructors can be defined | CO1 | L2 |
| | c) Destructors are preceded with a tilde symbol, and constructor | | |
| | doesn't | | |
| | d) Destructors are same as constructors in syntax | | |
| 23 | What is the output of the function complex()? a) 0j | | |
| | b) 0+0j | CO1 | L2 |
| | c) 0 | | |
| | d) Error | | |
| 24 | What does ~~5 evaluate to? a) +5 | | |
| | a) +3 b) -11 | CO1 | L2 |
| | c) +11 | | |
| | d) -5 | | |
| 25 | Which specifier should be used for member functions of a class to | | |
| | avoid inheritance? | | |
| | a) Privateb) Default | CO1 | L2 |
| | c) Protected | | |
| | d) Public | | |
| P. | ART B (4 Marks) | | |
| 1 | What is Structured programming? How does it minimize the complexity? | CO1 | L1 |
| 2 | Write a python program with an add() function to return the sum of | | |
| | two integers. | CO1 | L3 |
| 3 | List on Python Variables and its types. | CO1 | L1 |
| 4 | Compare structured programming and Procedural programming. | CO1 | L2 |
| 5 | Write a program to implement recursion. | CO1 | L3 |
| 6 | What is Data abstraction and explain its types. | CO1 | L1 |
| 7 | Define Inheritance. | CO1 | L1 |
| 8 | Write a program to create a list and print the values. | CO1 | L3 |
| P. | ART C (12 Marks) | ' | |
| 1 | There are 50 computers available in computer programming lab where | | |
| | each computers are used six hours per day. Write a Python program | | |
| | using classes and objects that contain getDetail() for getting input from | | |
| | user,calculatesecondperDay() for calculating the usage of each | | |
| | computer in seconds per day, calculateminutesperWeek() for | CO1 | L3 |
| | calculating the usage of each computer in minutes per week | | |
| | ,calculatehourperMonth() for calculating usage of each computer in | | |
| | hour per month and calculatedayperYear() for calculating usage of | | |

| | each computer in day per yearList all the Components of structured | | |
|---|--|-----|----|
| | programming language | | |
| | | | |
| 2 | Discuss the features of Procedural programming. | CO1 | L2 |
| 3 | Define Function and recursion and explain them in detail | CO1 | L2 |
| 4 | List out the Features of object oriented programming | CO1 | L2 |
| 5 | Write a python program to get square and cube of a number using Inheritance concept. | CO1 | L3 |
